ESSENTIAL FACTS
ABOUT THE COMPUTER AND VIDEO GAME INDUSTRY
“Video games are the future. From education and business, to art and entertainment, our industry brings together the most innovative and creative minds to create the most engaging, immersive and breathtaking experiences we’ve ever seen. The brilliant developers, designers and creators behind our games have and will continue to push the envelope, driving unprecedented leaps in technology impacting everyday life for years to come.”

—Michael D. Gallagher, president and CEO, Entertainment Software Association

The 2016 Essential Facts About the Computer and Video Game Industry was released by the Entertainment Software Association (ESA) in April 2016. The annual research was conducted by Ipsos MediaCT for ESA. The study is the most in-depth and targeted survey of its kind, gathering data from more than 4,000 American households. Heads of households and the most frequent gamers within each household were surveyed about their game play habits and attitudes.
Who is Playing

“We will see games everywhere around us. I'm not explicitly talking about 'gamification' or thin applications that strip games of their depth. We will see deep and immersive experiences that will transform learning in and outside of school, workforce training, medical treatment, social interactions, how people practice and rehearse real-world skills, and of course, entertainment.”

“Games are super flexible in the creation of personal learning pathways and we will soon see their adaptability in play much more widely in schools and among employers. I can imagine, too, that educators and health professionals will turn to games to tune-up and practice their skills much more frequently, from surgeons to pilots to teachers.”

—Michael Levine, founding director of the Joan Ganz Cooney Center at Sesame Workshop
